

VALGUS FOR KADRIORG PARK

Damiano Cerrone & Maris Kerge

- **LIVING ROOM**

Home-like lamps that make the park feel and look like living room. Reading lamps next to benches and other park furniture.

- **UN-NATURAL NATURE**

Truly „naturally-like“ enlightened areas of park. There is lighting that imitates (with light-dots) french garden stylish flowerbeds. There is sunrise-looking lighting solutions for groups of trees and bushes etc.

- **WORK / PLAY !**

Some of solutions will give for people chance to „work“ in a park. Swings that will produce the light when sit on them and start swinging. Chess-game that starts to illuminate when start playing.

- **THINK / PRAY !**

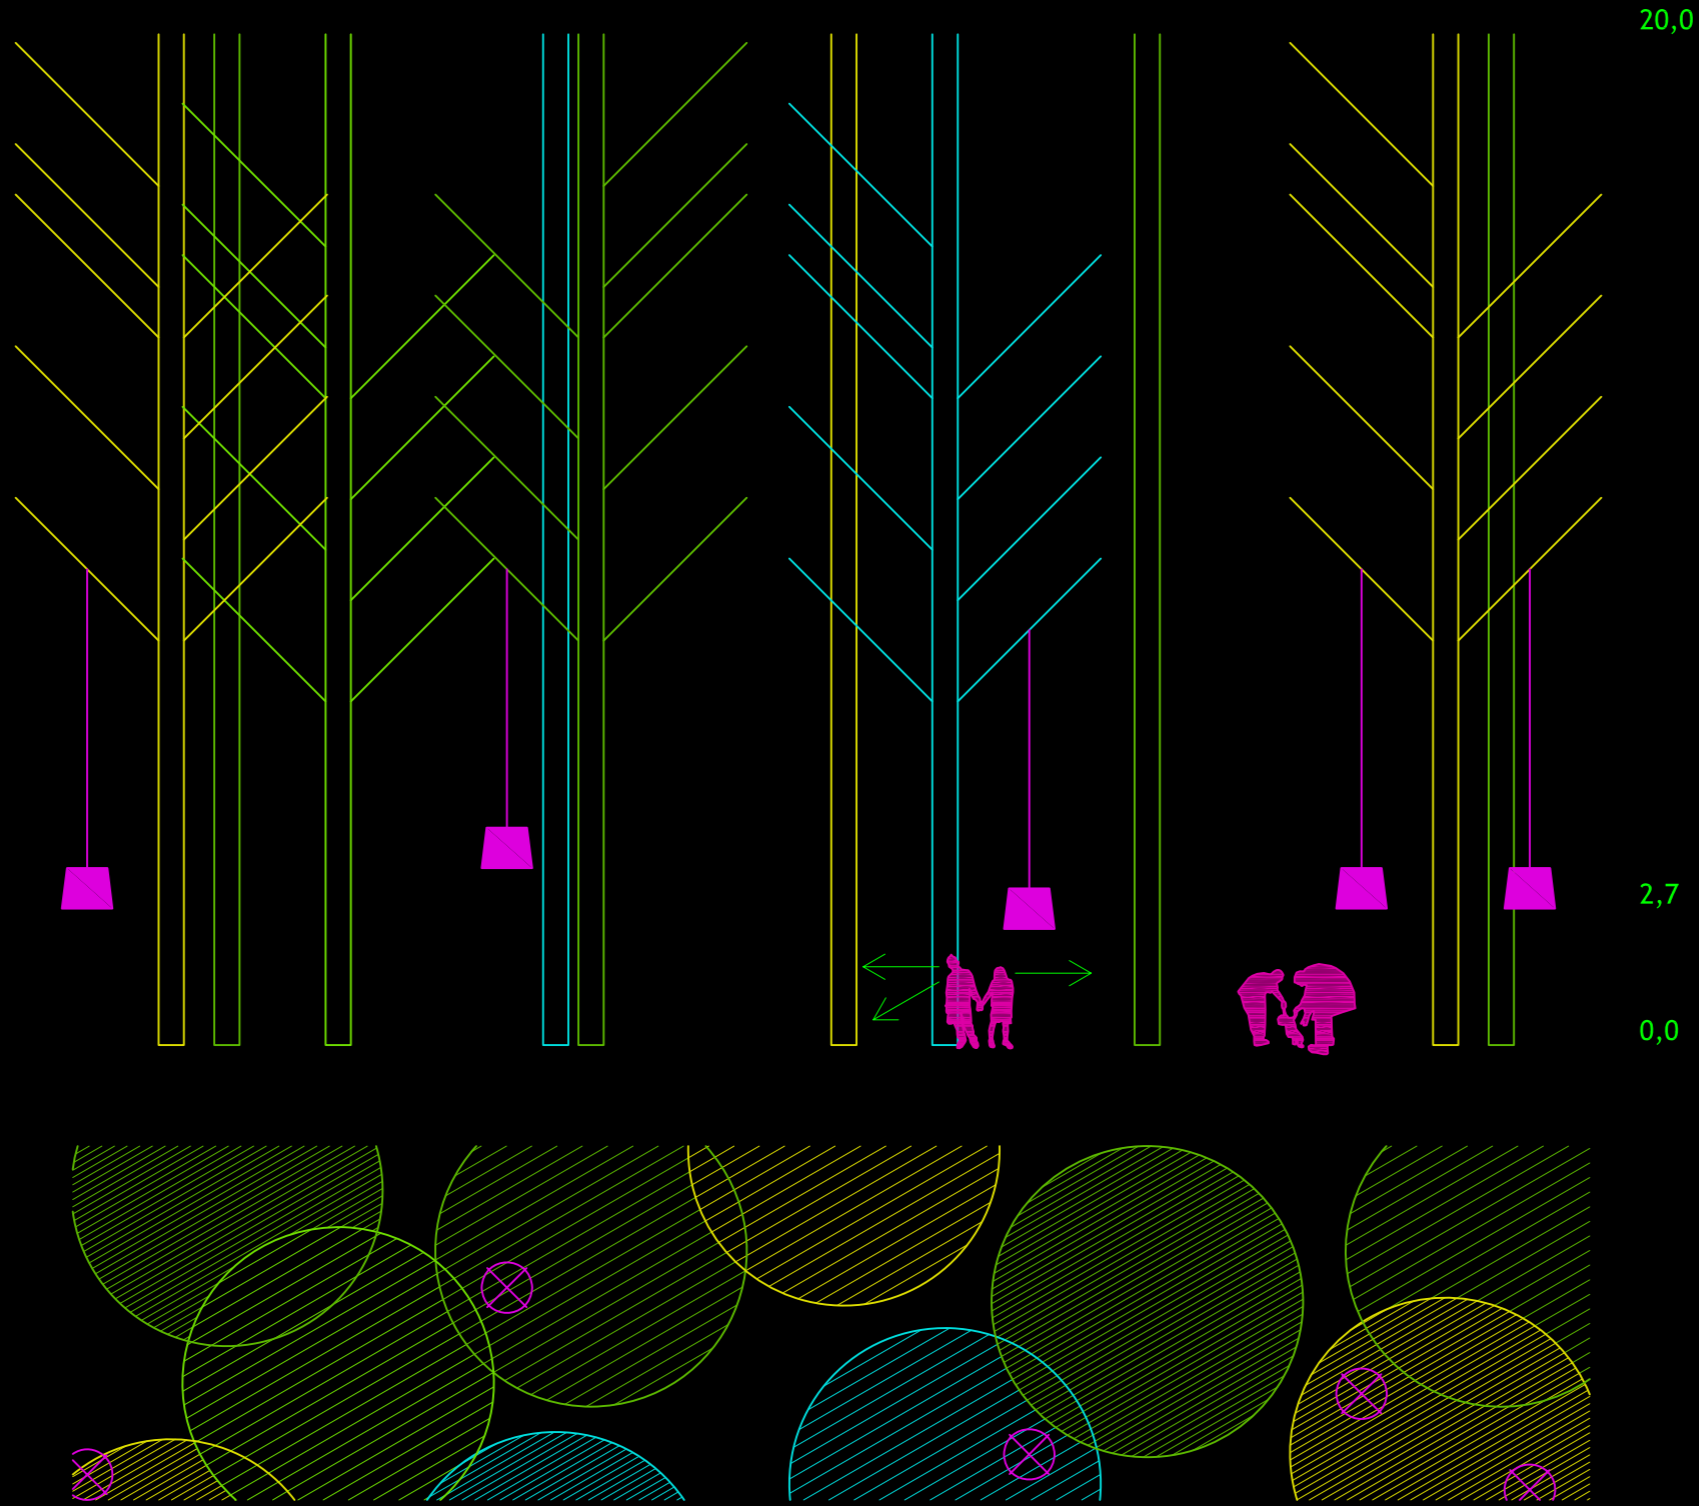

Today's people don't understand deep messages. Certain plants (white lily for instance) don't mean more than what they are and look like. Today's people wouldn't understand that a well in a center of the yard could be symbol of the whole (world). They need easier signs so there are set enlightened questions to make people think

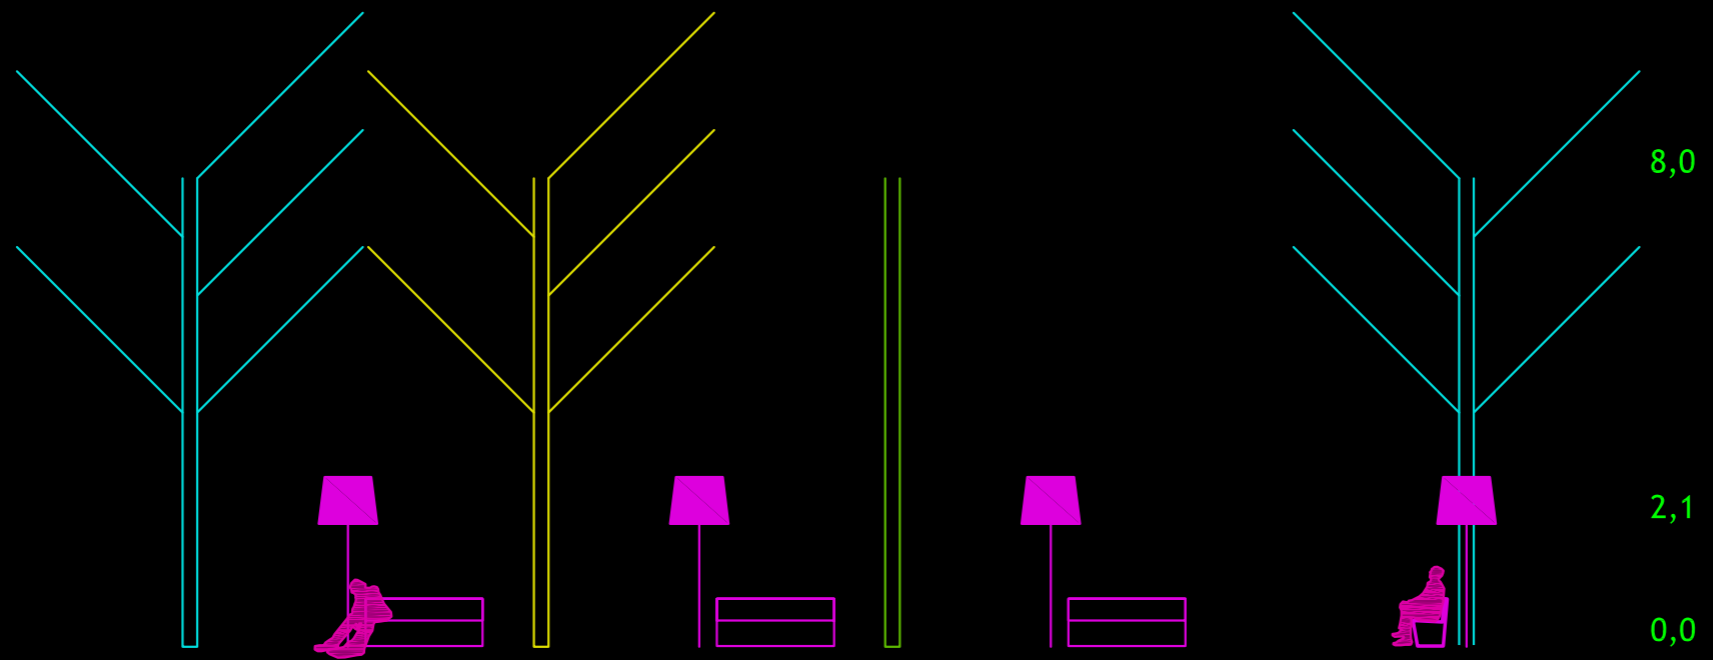

- **IMAGINARY VS REAL**

Dreams about Garden of Eden, a wish to get to the heaven... project gives imaginary-like lighting solutions that make people dream. Asking if what they see is real or not.

AFTER

BEFORE

An aerial night photograph of a city, showing a dense network of streets and buildings illuminated by warm, yellowish lights. The perspective is from a high angle, looking down on the urban landscape. The lights create a glowing pattern against the dark background of the city.

THANK YOU
